

Key Information Document

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

You are about to purchase a product that is not simple and may be difficult to understand.

Product name	Participation Certificate linked to the AtonRâ Sustainable Future (USD) Strategy
Product identifier	ISIN: XS1668108175 Common Code: 166810817
Listings	Luxembourg Stock Exchange Euro MTF
PRIIP manufacturer	J.P. Morgan Securities plc (www.jpmorgan-key-information-documents.com). The product issuer is JPMorgan Chase Bank, N.A. Call +44 (0)207 134 4181 for more information.
Competent authority of the PRIIP manufacturer	Authorised by the U.K. Prudential Regulation Authority and regulated by the U.K. Financial Conduct Authority and U.K. Prudential Regulation Authority
Date and time of production	14 October 2019 16:18 London local time

1. What is this product?

Type	English law governed certificates
Objectives (Terms that appear in bold in this section are described in more detail in the table(s) below.)	The product is designed to provide a return in the form of a cash payment on the maturity date . The amount of this payment will depend on the performance of the underlying . The product has a fixed term and will terminate on the maturity date . If, at maturity, the underlying has fallen below the initial reference level , the product may return less than the product notional amount or even zero. Termination on the maturity date: On termination of the product on the maturity date , you will receive a cash payment directly linked to the performance of the underlying . The cash payment will equal (i) the product notional amount multiplied by (ii) (A) the final reference level divided by (B) the initial reference level .

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.
The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the product issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Underlying	The underlying is the AtonRâ Sustainable Future (USD) Strategy (Bloomberg: JMLNARSF Index) which provides you with exposure to the performance of a basket of constituents. These constituents may consist of shares listed on global exchanges and the cash index . The allocator aims to achieve a positive return for the underlying over the medium to long term through selecting shares that exhibit a direct or indirect exposure to the sustainable development sector. The allocator may also allocate to the cash index . The allocator decides which constituents are included in the underlying on the launch and may change the composition of the underlying from time to time. Any allocator selection must meet certain restrictions which may limit the eligible constituents and their weightings in the underlying . Investors should satisfy themselves as to the ability of the allocator to achieve its aim. The allocator is paid a fee of 1.30% per annum plus a performance fee of 15% per annum. The product issuer is paid a fee of 0.20% per annum.
-------------------	--

The **reference level** of the **underlying** is based on the weighted returns of the **constituents**. The level of the **underlying** will also take into account a deduction on each rebalancing referred to as the rebalancing adjustment factor, other running adjustment factors referred to as the index allocator adjustment factor and index adjustment factor, foreign exchange conversion rates and dividends, in each case if relevant for the constituents. Further information on how the **underlying** is determined is set out in the index rules (see "Other Relevant Information" below). The index rules give various powers to the index sponsor and calculation agent of the **underlying** including the discretion to adjust its terms or terminate the **underlying**. This may affect the product or the return (if any) you receive. The index sponsor and calculation agent is J.P. Morgan Securities plc.

Underlying	The AtonRâ Sustainable Future (USD) Strategy (Bloomberg: JMLNARSF Index)	Initial reference level	100.00
Underlying market	Equity	Reference level	The closing level of the underlying as per the reference source
Product notional amount	USD 100	Reference source	J.P. Morgan Securities plc
Issue price	USD 100	Final reference level	The reference level on the final valuation date
Product currency	US Dollars (USD)	Initial valuation date	22 October 2018
Underlying currency	USD	Final valuation date	23 October 2028
Issue date	5 November 2018	Maturity date / term	6 November 2028
Calculation day	Each day other than a Saturday or Sunday	Cash index	J.P.Morgan Cash O/N Index of US Fed Funds (Bloomberg: JPCAUS1D Index)
Allocator	AtonRâ Parterns SA		

Intended retail investor The product is intended to be offered to retail investors who fulfil all of the criteria below:

1. they have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, with experience of investing in and/or holding a number of similar products providing a similar market exposure, either independently or through professional advice;
2. they seek capital growth, expect the movement in the underlying to perform in a way that generates a favourable return and have an investment horizon of the recommended holding period specified below;
3. they accept the risk that the issuer could fail to pay or perform its obligations under the product and they are able to bear a total loss of their investment; and
4. they are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 9 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment: USD 10,000.00

Scenarios		1 year	5 years	9 years (Recommended holding period)
Stress scenario	What you might get back after costs	USD 5,597.02	USD 5,926.10	USD 5,944.20
	Average return each year	-44.03%	-9.94%	-5.59%
Unfavourable scenario	What you might get back after costs	USD 9,441.26	USD 10,168.63	USD 10,186.73
	Average return each year	-5.59%	0.34%	0.20%
Moderate scenario	What you might get back after costs	USD 10,948.37	USD 13,110.75	USD 13,128.85
	Average return each year	9.48%	5.57%	3.06%
Favourable scenario	What you might get back after costs	USD 12,683.70	USD 16,886.78	USD 16,904.88
	Average return each year	26.84%	11.05%	5.98%

This table shows the money you could get back over the next 9 years under different scenarios, assuming that you invest USD 10,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if the issuer is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

4. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000.00. The figures are estimates and may change in the future.

Costs over time	Investment: USD 10,000.00			
	Scenarios	If you cash in after 1 year	If you cash in after 5 years	If you cash in at the end of the recommended holding period
Total costs		USD 374.81	USD 1,968.54	USD 3,046.63
Impact on return (RIY) per year		3.75%	3.66%	2.98%

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.			
One-off costs	<i>Entry costs</i>	0.02%	The impact of the costs already included in the price.
	<i>Exit costs</i>	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	<i>Other ongoing costs</i>	1.31%	The impact of the costs that we take each year for managing your investments.
Incidental costs	<i>Performance fees</i>	-	The impact of the performance fee. We take these from your investment if the product outperforms its benchmark.

The costs shown in the table above represent the split of the reduction in yield shown in the costs over time table at the end of the recommended holding period.

5. How long should I hold it and can I take money out early?

Recommended holding period: 9 years

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 6 November 2028 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Luxembourg Stock Exchange Euro MTF	Price quotation	Units
Smallest tradable unit	1 unit		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: J.P. Morgan Securities plc, KID complaints, Mail code BS04-0425, 25 Bank Street, London, E14 5JP, United Kingdom, by email to: kid.complaints@jpmorgan.com or at the following website: www.jpmorgan-key-information-documents.com.

7. Other relevant information

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are available free of charge from The Bank of New York Mellon, One Canada Square, London, E14 5AL, United Kingdom.

The information contained in this Key Information Document does not constitute a recommendation to buy or sell the product and is no substitute for individual consultation with your bank or advisor.

The product is not in any way sponsored, sold or promoted by any relevant stock market, relevant index, related exchange or index sponsor. Further information in respect of the index is available from the index administrator.

The offering of this product has not been registered under the U.S. Securities Act of 1933. This product may not be offered or sold, directly or indirectly, in the United States of America or to U.S. persons. The term "U.S. person" is defined in Regulation S under the U.S. Securities Act of 1933, as amended.

The strategy rules and the Q&A are available on request free of charge from J.P. Morgan Securities plc, 25 Bank Street, Canary Wharf, London E14 5JP.
